

# Environmental Policy Statement

Quickskip Limited accepts its responsibilities in environmental matters and recognises that good environmental management must be an integral and fundamental part of our business. Although we believe that we have a minimal impact on the environment, Quickskip Limited aims to continue to improve its environmental performance by:

- Complying with the requirements of all environmental legislation;
- Maximise the recyclable materials from our waste processing operations to therefore minimise the amount of material taken to landfill;
- To put environmental sensitivity at the forefront of business decisions and operations wherever possible;
- Assessing the environmental effects of all business operations;
- To minimise the use of energy, and eliminate wasteful use;
- To schedule all transportation in a manner which will minimise toxic emissions, by maximising collection runs, and using return-haulage;
- To offer free of charge, advice, guidance and learning tools to all or any party, whether of commercial value to the company or not, in order to widen public knowledge of pollutants, harmful products, availability of recycling outlets, and sustainable living and working;
- To keep abreast of developments in recycling techniques and systems which widen the scope of recycling feasibility;
- Raise awareness, encourage participation and train employees;
- Expecting similar environmental standards from all suppliers and contractors;
- Actively promoting recycling internally to our staff and externally to our customers and suppliers;
- Conserving natural resources through increased energy efficiency and better water management;
- Managing waste and avoiding the use of hazardous substances;
- Implementing the use of recycled materials where appropriate;
- Preventing and reducing pollution by implementing efficient control procedures to monitor and manage materials and processes that impact on the environment;
- Making our Environmental Policy publicly available to interested parties;
- Continually seeking to improve environmental performance;
- Monitoring progress and review performance annually;
- Not to send any recyclable materials for Incineration, on the basis that the residues from incineration are highly toxic and do in fact end up in landfill, whereas this can be avoided by recycling or reprocessing.

Delivering our operational plans within this policy will enable Quickskip Limited to develop sustainable practices and deliver meaningful contributions to the quality of our environment.

Joe Lively
